The 2nd summer university of CADTM Europe, to be held from Friday 1st to Sunday 3rd July at Wépion (Belgium) is the **highlight** of the year, a time to look back upon past and coming events as well as our **responses and analyses**, in a relaxed atmosphere.

In 2009 we had developed a collective analysis about the global **crisis of capitalism** and what resistances and alternatives could be opposed. As in 2009, and perhaps even more so, the 2nd summer university of CADTM Europe will give us an opportunity to examine the development of the international crisis and build a much needed **response against debt** and austerity measures at a European level. Indeed, with the help of the IMF and the European Commission, Capital and the leaders of European countries are determined to have the majority of workers and unemployed pay for the crisis.

And we intend to do more! With some 300 expected participants and 25 workshops, we will analyze the crisis that hits EU countries, the US, Japan, Iceland. We will also address the new forms of **colonialism** 50 years after declarations of independence in African countries, current developments in Asia (China, Thailand,...), **alternatives** implemented in Venezuela, Ecuador and Bolivia. We will consider issues related to the defence of the environment, women's struggles, **human rights**, the legal foundations for **debt cancellation**, current social struggles, and many other. Our summer university is also an opportunity to share our pedagogical tools and practices.
